Scientia features

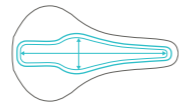

Body contour

A radius-specific design to provide optimum comfort for differing spine angles. The more inclined the Riding Position, the smaller the edge-radius.

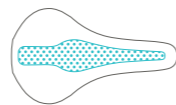

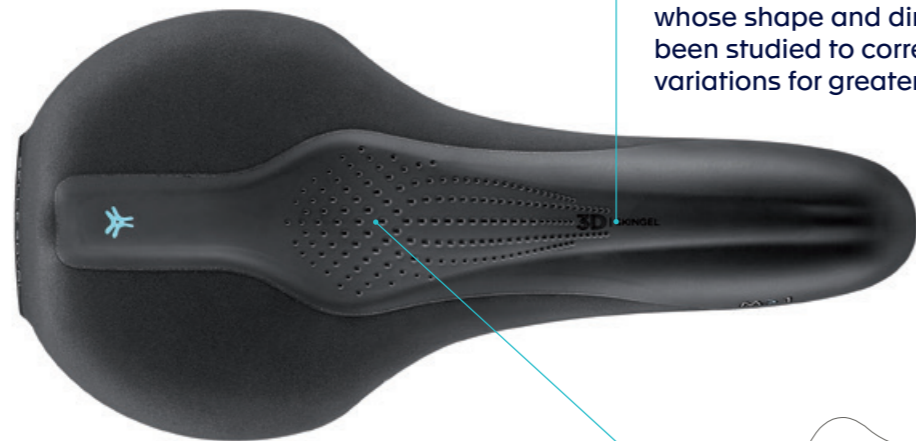

Rear plateau

An elevated rear section to prevent backward sliding and decrease pressure in the saddle middle which can cause discomfort.

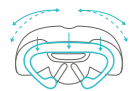

Central reservoir

Indentation in the saddle middle whose shape and dimensions have been studied to correspond to ischial variations for greater comfort.

3D Skingel

Royalgel™ is placed intelligently at critical points of contact on the saddle surface for added shock absorption, while reducing overall saddle weight.

Curva suspension

The unique curved suspension design is attached at the rear of the base to offer exclusive comfort by avoiding pressure on the seat bone contact points and guaranteeing additional lateral flexibility.

Measurement steps

1 Find your riding position

	ATHLETIC
	A

	MODERATE
	M

	RELAXED
	R

2 Determine your ischial variation

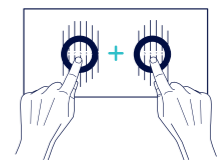

Reset the gel pad.

Sit at 90° and apply pressure.

Find the centres of the two ischial impressions and add together the two numbers. The result is your ischial distance.

Example
5cm + 7cm = 12cm

	< 11 cm SMALL
	1

	11 - 13 cm MEDIUM
	2

	> 13 cm LARGE
	3

A NEW LOOK TO GET EVEN CLOSER TO CYCLISTS

Selle Royal has completely renewed its look and reorganised its product range. The goal is to improve communication with its consumers by speaking the community's language, understanding their needs, and helping them to choose the right saddle for maximum comfort, without renouncing style.

Even fresher. Even more POP.
Even more Support Cyclists.

Product categories

All Journeys Riding Everywhere

These best-in-class Selle Royal products are adaptable and perfect for those who don't want to compromise on excellence – both in the city or adventuring outdoors. With the All Journeys range, premium materials and innovative technologies result in the ultimate in comfort, striking design and durability.

Adventure Time Exploring Outdoors

A breath of fresh air for all excursions. No matter if you ride for fun, fitness or touring far away: this range of saddles gives its best to help you enjoy your free time on the bike. All of these models are suitable for long rides and different types of terrain – so you can explore the wilds to your heart's content.

Urban Life Moving in the City

Ultimate comfort for cycling in the city. Any saddle belonging to this range will become your trusted companion for everyday life. From short rides to long commutes, from modern style to high reliability, select from many models according to your needs in the city.

New packaging

The saddle introduces itself

Product key benefits are clearly and concisely highlighted

The product range defines the saddle use to guide the consumer to the right saddle choice

The riding position is clearer and easier to understand

30-Day Comfort Guarantee highlighted on the front

New colours for new ranges

Package can be opened to include more product information

Explanation of the saddle's key benefits and the relatable product features

Explanation of the riding position concept and the unisex approach

Indication of Made in Italy

New texts in 6 languages, with an easier and more engaging copy

Indications of sustainability and recycling: packaging made from 100% recycled and recyclable paper

The Riding Position Concept

Riding position is the crucial factor in choosing the optimal saddle. According to your riding style, the way your sit bones rest on the saddle varies substantially and this consequently affects the level of comfort. Selle Royal saddles are ergonomically designed to fit all ischial bones widths and satisfy the anatomical needs of both men and women, guaranteeing pressure relief in the most sensitive areas.

Consumers should be invited to select their riding position among **45° (Athletic)**, **60° (Moderate)** and **90° (Relaxed)** to enjoy their rides, pain-free!

30 Day Comfort Guarantee

Selle Royal offers a **30-Day Comfort Guarantee on all products**. Both on the front and on the back, the new packaging informs consumers about this risk-free offer. Therefore, it is important that all Selle Royal partners and dealers are prepared and committed to assist consumers with the entire return procedure. For more information or support, Selle Royal customer service is at your disposal to provide assistance!

Product features

Royal Comfort

ROYALGEL™
Superior to any other padding material for its unique formulation, Royalgel™ provides the highest level of comfort. Durable and versatile, this technology absorbs pressure and distributes it across the saddle surface, ensuring the best support for even your longest rides.

Immediate Comfort

SLOW FIT FOAM
Ideal for short and easy rides, Slow Fit Foam is an exclusive Selle Royal technology designed to fit the shape of your body. Its memory foam formulation with a slow, bounce-back effect provides immediate comfort and ensures a smooth feeling while riding.

Firm Comfort

FOAM MATRIX
Robust yet flexible for everyday rides. If you're looking for firm and solid support during your short and easy trips, a saddle with Foam Matrix padding is the answer.

Extreme Durability

UNITECH
With padding and cover all in one piece, saddles with Unitech technology are designed to last, being highly resistant to abrasion as well as waterproof. This means that you don't need to worry about exposing your saddle to the elements, or the dangers of the city.

Waterproofness

ROYAL VACUUM
Enjoy a dry ride with a water-resistant saddle. This patented Selle Royal technology allows the saddle to be 100% sealed and substantially waterproof, even when exposed to heavy, wet weather.

Fresh Seat

COOL COVER
This special cover composition reflects sunlight to keep your saddle 25°C cooler than a standard black saddle – so you can leave your bike in the sun without thinking twice.

Perineal Ventilation

VENTILATION CHANNEL
Don't let overheating spoil your ride: the ventilation function allows for air to flow through your saddle via an anatomically designed cut-out, ensuring a non-sweaty, breezy feeling while cycling. Designed for cool rides and reduced pressure in the perineal area.

Perineal Relief

ERGONOMIC HOLE
An ergonomic central cut-out designed to relieve pressure in the perineal area, making it ideal for the most sensitive riders. No pain, just gain on your rides!

ERGONOMIC CHANNEL
This indent is designed to ergonomically follow the shape of the body, delivering pressure relief in the soft tissue areas and support in the ischiatic zone. No pain, just gain on your rides!

High Resistance

STRENGTEX
This is an ultra-resistant cover material made to accompany the tough life of any saddle. Thanks to its multi-layer structure, your Strengetex saddle doesn't fear punctures, cuts, tears, cracks or aging and it is thus perfect for the urban jungle.

Shock Absorption

FLEXITE SYSTEM
Maximised flexibility and shock absorption are provided by the unique indented construction of the shell, ensuring smooth rides across town or into the wild.

THERMOPLASTIC DAMPER
Working like an elastomer, the Thermoplastic Damper positioned at the rear of the saddle will smooth out bumpy rides, silently absorbing even the most severe shocks.

ELASTOMERS
You always watch out for unexpected obstacles, but if you do miss one, your saddle with elastomers will absorb even the most severe shocks without making a sound.

CUP SPRINGS
You always watch out for unexpected obstacles, but if you do miss one, your saddle with cup springs will absorb even the most severe shocks without making a sound.

Safe Sides

DOUBLE-COVER SIDE PROTECTION
Say no to scuffed saddle sides and lean your bike against anything in total freedom: the double-layer material applied to the sides of the saddle increases resistance against impacts and abrasions.

SCUFF GUARDS
Say no to scuffed saddle sides and lean your bike against anything in total freedom: the extra protective inserts applied to the sides of the saddle increase resistance against impacts and abrasions.

Safety at Night

REFLECTIVE FILM
Either riding in town or exploring the wilderness, it's paramount to always be seen by cars, bicycles and other vehicles. If, or rather when, your rear light fails you, for an extra dose of safety this reflective film will have your back.

Spring Suspension

DOUBLE SPRINGS
Striking look and excellent suspension, all in one: the standard springs have evolved to improve suspension performance while retaining that classic allure so you don't have to compromise on style – or bounce.

SPRINGS
Sometimes older is better: springs add great suspension and a touch of class to any bike.

Clip & Go

INTEGRATED CLIP SYSTEM
A must for your Selle Royal accessories: the Integrated Clip System positioned at the rear of your saddle will make the attachment of a Selle Royal saddle bag or other accessories an easy clip away.

MULTI-TOOL
Always be prepared for the unexpected. This multi-tool attaches to the rear of your Selle Royal saddle equipped with the Integrated Clip System (ICS) to always be on hand for quick adjustments and repairs on the road. Protected by an anti-shock rubber housing, this compact and secure package offers 9 tools for years of reliable use.

Support up to 150kg

HEAVY-DUTY SUPPORT
Tested up to 150kg, a reliable and durable saddle which doesn't fear large weight.

E-Bike Specific

E-FIT DESIGN
An innovative wave-shaped design to help you immediately find the correct position on your e-bike, its elevated rear section will prevent you from sliding backward to ensure maximum comfort for your back, while the uniquely flexible saddle sides add stability and facilitate pedalling.

Easy Handling

E-GRIP
Get a full hold on your e-bike with this smart feature: an integrated, soft touch handle that makes manoeuvring easy.

Sustainable Choice

ECO APPROACH
Selle Royal is reinforcing its commitment to reduce the environmental impact of its products. The base of this saddle is made using 100% recycled plastic, while maintaining the same level of flexibility and comfortable performance. The BIO-sourced cover consists of 50% organic materials, guaranteeing the same elasticity, abrasion resistance and comfort level whilst using only natural plasticizers.

Royalgel™

Thanks to its unique tridimensional gel structure, Royalgel™ guarantees the highest level of comfort, reducing pressure peaks by 40% compared to standard padding materials.

Water Resistant

Royal Vacuum is a patented Selle Royal technology that allows the saddle to be 100% sealed and therefore water resistant. Also, it makes the saddle 20% lighter!

E-Fit Design

An elevated rear section to prevent backward sliding and shorter nose to aid mounting. The waved shape also helps the rider to immediately find the correct position and support for the ride.

The saddle sides are uniquely flexible thanks to a special material treatment to add stability and facilitate pedalling.

E-Grip

A soft-touch, rubberised handle integrated into the saddle rear for easy manoeuvring while maintaining access to the attached accessories.

Integrated Clip System

A patented clip system positioned at the rear of the saddle for easy attachment of a Selle Royal saddle bag or other accessory.

Multi-Tool Integrated

This multi-tool attaches to the rear of any Selle Royal saddle thanks to the Integrated Clip System (ICS). This comes already included in the Athletic and Moderate Vaia saddles to always be on hand for quick adjustments and repairs on the road. Protected by an anti-shock rubber housing, this compact and secure package offers 9 tools for years of reliable use.

Water Resistant

Royal Vacuum is a patented Selle Royal technology that allows the saddle to be 100% sealed and therefore water resistant. Also, it makes the saddle 20% lighter!

Ergonomic Hole

An ergonomic central cut-out designed to relieve pressure in the perineal area, making it ideal for the most sensitive riders. This cutout-saddle ergonomically follows the shape of the body, delivering superior pressure relief in the perineal area and support in the ischiatic zone.

Royalgel™

Thanks to its unique tridimensional gel structure, Royalgel™ guarantees the highest level of comfort, reducing pressure peaks by 40% compared to standard padding materials.

Thermoplastic Damper
(only on Relaxed Riding Position)

Working like an elastomer, this permanently non-deformable mono damper positioned at the rear of the saddle absorbs even the most severe and unexpected shocks for safe, silent and comfortable performance.

Integrated Clip System

A patented clip system positioned at the rear of the saddle for easy attachment of a Selle Royal saddle bag or other accessory.

Supporting cyclists has always been the Selle Royal mission: for decades we have offered the best ride possible through affordable, high-quality saddles and accessories for cycling. But we wanted to do more, so we came up with another way to make the riding experience even more enjoyable.

Have a coffee while we check your bike!

The Selle Royal Van is travelling around Europe to meet cyclists and hear their stories, offering free coffee, bike check-ups, and a warm smile from our Van team. All cyclists are invited to be a part of this experience, no matter what you ride!

Simply join us by following the Van adventures and you'll know where to find us next.
